Pomegranate · Wellness · Luxury

How to Build a Luxury Scroll Website

A Complete Step-by-Step Guide

AI Image Generation → Seedance 2.0 Video → Claude Code → Live Website

By Dhiraj Sarkar · AutomationX

[YouTube](#) · [Instagram](#) · [Free Community](#)
2026

— OVERVIEW —

What You Will Build

This guide walks you through building a complete luxury scroll-driven cinematic website — the RUBRA Pomegranate site. Scrolling controls a cinematic video frame by frame. Below the hero, a series of world-class animated sections deliver an experience that genuinely stops people scrolling on Instagram.

The full pipeline:

- ◆ Generate 11 images using Higgsfield AI
- ◆ Create a 15-second cinematic hero video using Seedance 2.0 on Higgsfield
- ◆ Create 3 looping 4-second card videos using Seedance 2.0 on Higgsfield
- ◆ Re-encode videos with FFmpeg for smooth frame-accurate scrubbing
- ◆ Create a CLAUDE.md rules file in your project folder
- ◆ Open Claude Code in VS Code and build the full website in one pass
- ◆ Serve locally with Python and test everything
- ◆ Deploy to GitHub + Vercel for a live public URL

💡 *This guide uses Claude Code inside VS Code — the extension — not the claude.ai chat website. Claude Code reads your project files and CLAUDE.md directly from the folder.*

— STEP 1 —

Create Your Project Folder

Create a new empty folder on your computer. Name it:

```
rubra-pomegranate
```

At the end your complete folder looks exactly like this:

```
rubra-pomegranate/
```

```
|— CLAUDE.md           ← rules file (you will create this)
|— index.html          ← Claude Code builds this automatically
|— pomegranate-story.mp4 ← 15-second hero scroll video
|— dawn-product.png
|— dusk-product.png
|— night-product.png
|— newsletter-bg.png
|— collection-bg.png
|— card-press.mp4       ← 4-second PRESS card loop
|— card-pour.mp4        ← 4-second POUR card loop
|— card-perfect.mp4     ← 4-second PERFECT card loop
```

⚠ All image files in this project are .png — not .jpg. Always use .png extensions.

— STEP 2 —

Generate All Images

You need 11 images total. Generate them in order. For images 2–6 always upload the previous image as a reference — this keeps lighting, camera angle and style perfectly consistent so the Seedance video looks like one seamless sequence.

2.1 Video Keyframe Images — 6 images

These become start and end frames for your Seedance video clips.

Save as: **image-1-pomegranate-whole.png**

Reference: *None — this is your first image*

A single whole pomegranate floating in the exact vertical center of the frame, pure black background, dramatic warm crimson-amber spotlight from directly above, deep red skin with a natural crown at the top, surface texture rich and leathery with subtle highlights, floating completely in mid-air with no surface no floor no table beneath it, subtle deep red glow underneath, ultra photorealistic 8K, luxury wellness product photography, no text no labels no watermarks

Save as: **image-2-pomegranate-cracked.png**

Reference: *Upload image-1-pomegranate-whole.png*

The same pomegranate now dramatically cracked open in the exact vertical center, pure black background, warm crimson-amber spotlight from directly above, the outer skin split wide revealing hundreds of glistening ruby-red seeds each catching the light like a precious gemstone, a few seeds floating outward in perfect orbital formation, floating completely in mid-air no surface no floor, ultra photorealistic 8K, no text no labels no watermarks

Save as: **image-3-seeds-cascading.png**

Reference: *Upload image-2-pomegranate-cracked.png*

Hundreds of glistening ruby-red pomegranate seeds freed from the fruit and cascading downward in slow motion, pure black background, warm crimson-amber spotlight from directly above, seeds falling like a waterfall of precious rubies each catching the light with a deep jewel-like glow, some seeds trailing thin threads of deep red juice, ultra photorealistic 8K, no text no labels no watermarks

Save as: **image-4-glass-seeds-entering.png**

Reference: *Upload image-3-seeds-cascading.png*

A stunning handblown glass cup with no handles floating in the exact vertical center, pure black background, dramatic warm crimson-amber spotlight from directly above, crystal clear thin walls, small amount of deep red juice at the bottom, hundreds of ruby-red seeds actively falling from above into the glass in dramatic slow motion, tiny crimson splashes where seeds hit the juice surface, floating completely in mid-air no surface no floor no table, ultra photorealistic 8K, no watermarks

Save as: **image-5-glass-full-glowing.png**

Reference: *Upload image-4-glass-seeds-entering.png*

The same handblown glass cup now completely filled with rich deep red pomegranate juice glowing from within like liquid ruby, dozens of seeds visible floating at different depths through the crystal clear glass walls, the liquid radiating a deep crimson-red light from within, thin layer of rich red foam at the very top, floating completely in mid-air no surface no floor, ultra photorealistic 8K, no text no labels no watermarks

Save as: **image-6-hands-wrapping-glass.png**

Reference: *Upload image-5-glass-full-glowing.png*

The same glass cup filled with glowing deep red pomegranate juice floating in the exact vertical center, pure black background, warm crimson-amber spotlight from above, two elegant hands entering the frame from both sides, fingers gently curling around the outside of the glass, the deep red glow casting a subtle crimson hue on the skin, floating completely in mid-air no surface no floor, ultra photorealistic 8K, no text no labels no watermarks

2.2 Product Images — 3 images

Use dawn-product.png as the reference for both DUSK and NIGHT to keep the tin shape consistent.

Save as: **dawn-product.png**

Reference: *None*

A single premium luxury pomegranate juice tin floating in the exact center, pure black background, warm golden morning light from above at 45 degrees, deep midnight navy matte finish, the word DAWN in small elegant gold lettering, beside it three loose glistening pomegranate seeds and a piece of dried pomegranate skin, floating in mid-air no surface no floor, ultra photorealistic 8K, luxury wellness brand product photography, no watermarks

Save as: **dusk-product.png**

Reference: *Upload dawn-product.png*

A single premium luxury pomegranate juice tin floating in the exact center, pure black background, warm amber evening light from above at 45 degrees, deep burgundy wine-red matte finish, the word DUSK in small elegant gold lettering, beside it three loose glistening pomegranate seeds and a dried rose petal, floating in mid-air no surface no floor, ultra photorealistic 8K, luxury wellness brand product photography, no watermarks

Save as: **night-product.png**

Reference: *Upload dawn-product.png*

A single premium luxury pomegranate juice tin floating in the exact center, pure black background, cool silver moonlight from above at 45 degrees, deep matte black finish, the word NIGHT in small elegant silver lettering, beside it three loose glistening pomegranate seeds and a single small dried flower, floating in mid-air no surface no floor, ultra photorealistic 8K,

luxury wellness brand product photography, no watermarks

2.3 Background Images — 2 images

Save as: **newsletter-bg.png**

Reference: *None*

A vast pomegranate orchard at golden hour, rows of pomegranate trees heavy with deep red ripe fruit stretching to the horizon, warm amber-gold late afternoon sun raking across the orchard from the left, some pomegranates cracked open revealing ruby seeds, soft golden mist hovering between the trees, highly cinematic perspective slightly elevated, ultra photorealistic 8K, no people no text no watermarks

Save as: **collection-bg.png**

Reference: *None*

A vast dark pomegranate orchard at deep twilight, rows of trees stretching to the horizon, the sky near-black deep navy with a faint ember-crimson glow at the very bottom, a few ripe pomegranates glowing deep red on dark branches, atmospheric dark mist between the trees, extremely cinematic, moody, ultra dark luxury editorial feel, no people no text no watermarks, ultra photorealistic 8K

— STEP 3 —

Generate the Hero Video

The hero video is a 15-second continuous cinematic sequence. Generated using Seedance 2.0 on Higgsfield. Upload all 6 keyframe images and tag each using the @ symbol inside your Stitch prompt.

💡 Tool: Seedance 2.0 on Higgsfield.ai · Duration: 15 seconds · Save output as: pomegranate-story.mp4

Stitch Prompt

Upload all 6 images first. Tag each one with @ when writing the prompt.

Using [@image-1] [@image-2] [@image-3] [@image-4] [@image-5] [@image-6] create a single continuous 15-second cinematic video in this exact sequence.

Start with [@image-1] whole pomegranate floating in darkness, hold 2 seconds. Slowly transition into [@image-2] as the pomegranate cracks open revealing glowing ruby seeds, hold 2 seconds.

Smoothly transition into [@image-3] as hundreds of seeds burst free and cascade downward like falling rubies in slow motion, hold 3 seconds.

Transition into [@image-4] as seeds enter a crystal glass and crimson splashes bloom on impact, hold 3 seconds.

Slowly dissolve into [@image-5] as the glass fills completely with deep glowing red liquid like liquid ruby, hold 2 seconds.

Final transition into [@image-6] as two elegant hands enter from both sides and gently wrap around the glowing glass, hold 3 seconds.

Pure black background throughout. No cuts, only smooth slow morphing transitions.

Warm crimson-amber spotlight from above throughout.

Ultra cinematic, slow motion, luxury wellness brand feel. No text no watermarks.

— STEP 4 —

Generate the Card Videos

Generate three 4-second looping videos for the PRESS / POUR / PERFECT stacking cards. Also generated with Seedance 2.0 on Higgsfield. Upload the matching still image as the start frame for each.

CARD VIDEO 1 — PRESS

Save as: **card-press.mp4**

Reference: *Upload the PRESS still image as start frame*

Using this image as the start frame, create a slow motion 4-second cinematic loop.

The pomegranate is cold-pressed by two hands, ruby juice slowly emerges and drips downward, seeds glisten and catch the crimson spotlight, juice droplets fall in

ultra slow motion suspended like rubies, pure black background throughout, warm crimson spotlight from above, no camera movement, loop-friendly ending

CARD VIDEO 2 — POUR

Save as: `card-pour.mp4`

Reference: *Upload the POUR still image as start frame*

Using this image as the start frame, create a slow motion 4-second cinematic loop. A thin stream of deep ruby pomegranate juice pours continuously from above into the crystal glass, the stream glows like liquid gemstone, seeds fall alongside in ultra slow motion, pure black background throughout, no camera movement, warm crimson spotlight from above, loop-friendly ending

CARD VIDEO 3 — PERFECT

Save as: `card-perfect.mp4`

Reference: *Upload the PERFECT still image as start frame*

Using this image as the start frame, create a slow motion 4-second cinematic loop. The glass cup full of glowing ruby pomegranate juice floats in pure black, three seeds slowly drift and rotate inside the liquid visible through the glass, tiny bubbles rise gently, the liquid glows deep crimson pulsing like a heartbeat, fine mist rises from the top, pure black background, no camera movement, loop-friendly ending

— STEP 5 —

Re-encode the Hero Video

Before using the hero video in the website, re-encode it with FFmpeg. This makes every frame a keyframe so the browser can seek to any frame instantly — enabling smooth scroll scrubbing.

 **This step is required. Without it the scroll video will stutter or freeze when you scroll.**

Run this command in your terminal:

```
ffmpeg -i pomegranate-story.mp4 \
-vf scale=960:-1 \
-movflags faststart \
-vcodec libx264 \
-crf 20 \
-g 1 \
-pix_fmt yuv420p \
pomegranate-story-scrub.mp4
```

Then rename pomegranate-story-scrub.mp4 to pomegranate-story.mp4 and replace the original in your project folder.

— STEP 6 —

Create the CLAUDE.md File

CLAUDE.md sits in your project folder and tells Claude Code the rules before it writes a single line of code. It prevents wrong architectural decisions and keeps every session consistent.

 Create a file called *CLAUDE.md* in your rubra-pomegranate folder. Paste the content below exactly.

```
# RUBRA — Project Rules
# Read this entire file before writing any code.

## WHAT YOU ARE BUILDING
Single-file luxury scroll website for a pomegranate wellness brand called RUBRA.
Everything lives in one file: index.html.
No npm. No package.json. No server.js. No build tools.
Served locally with: python3 -m http.server 8080

## HARD RULES — NEVER BREAK
1. ONE FILE ONLY — everything in index.html
2. NO CANVAS EVER
3. VIDEO SCRUB uses getBoundingClientRect() only — never window.scrollToY alone
4. Always attach BOTH scroll listeners:
  window.addEventListener("scroll", requestTick, { passive: true })
  lenis.on("scroll", requestTick)
5. Never animate the pinned container — only animate children inside it
```

6. Never use GSAP `pin:true` AND CSS `position:sticky` on the same element
7. Never add `will-change:transform` or `transform:translateZ(0)` to `#source-video`
 - degrades video quality on Retina displays

```
## CDN IMPORTS — exact order, always
<link rel="stylesheet" href="https://unpkg.com/lenis@1.3.23/dist/lenis.css">
<script src="https://cdnjs.cloudflare.com/ajax/libs/gsap/3.12.5/gsap.min.js">
</script>
<script
src="https://cdnjs.cloudflare.com/ajax/libs/gsap/3.12.5/ScrollTrigger.min.js">
</script>
<script src="https://unpkg.com/lenis@1.3.23/dist/lenis.min.js"></script>

<link href="https://fonts.googleapis.com/css2?family=Cormorant+Garamond:ital,
wght@0,300;0,400;1,300;1,400&family=Inter:wght@300;400;500&display=swap"
rel="stylesheet">

## LENIS SETUP
const lenis = new Lenis({ lerp: 0.075, smoothWheel: true });
lenis.on("scroll", ScrollTrigger.update);
gsap.ticker.add((time) => { lenis.raf(time * 1000); });
gsap.ticker.lagSmoothing(0);

## VIDEO SCRUB JS
(() => {
  const track = document.querySelector(".hero-scroll-track");
  const video = document.getElementById("source-video");
  if (!track || !video) return;
  let ticking = false, duration = 0, initialized = false;
  const clamp = (v,lo,hi) => Math.min(Math.max(v,lo),hi);
  function update() {
    if (!initialized||!duration||!Number.isFinite(duration)) return;
    const total = track.offsetHeight - window.innerHeight;
    const rect = track.getBoundingClientRect();
    const passed = clamp(-rect.top, 0, total);
    const progress = total > 0 ? passed/total : 0;
    if (video.readyState >= 2)
      video.currentTime = clamp(progress*duration, 0, duration);
    updatePhases(progress);
  }
  function requestTick() {
    if (ticking) return; ticking = true;
    requestAnimationFrame(() => { update(); ticking = false; });
  }
  function initScrub() {
    duration = video.duration;
    if (!duration||!Number.isFinite(duration)) return;
    video.pause(); video.currentTime = 0; initialized = true;
    window.addEventListener("scroll", requestTick, { passive:true });
    window.addEventListener("resize", requestTick);
    if (typeof lenis !== "undefined") lenis.on("scroll", requestTick);
    requestTick();
  }
  initScrub();
})();
```

```

    }
    if (video.readyState >= 2) initScrub();
    else {
        video.addEventListener("loadedmetadata", initScrub, { once:true });
        video.addEventListener("loadeddata", initScrub, { once:true });
        video.load();
    }
  }) ();

## COLORS — RULE: Red is NEVER used as text color
#f5f0eb          off-white    ALL text, headings, nav, product names
rgba(245,240,235,0.45) muted cream  Section eyebrow labels
#a08080          muted rose    Body and description text
#000000          black        Body background, footer
#8b0000          deep crimson  Progress bar background only
#c0002a          ruby red     Buttons, accent lines, card borders

## FONTS
Cormorant Garamond — all display/headings
Inter              — all body/labels

## ASSETS
All image files are .png — not .jpg. Always use .png extensions.

## ALWAYS END THE SCRIPT WITH
ScrollTrigger.refresh();

```

— STEP 7 —

Build the Website

Open VS Code. Open your rubra-pomegranate folder. Start Claude Code using the VS Code extension. Paste the master prompt below. Claude Code reads CLAUDE.md automatically and builds everything.

💡 After Claude Code finishes, start your local server: `python3 -m http.server 8080` — then open `http://localhost:8080`

Master Build Prompt — paste in one go

Read CLAUDE.md fully before writing anything.
Build index.html for RUBRA. All assets are in this folder.
Single file only. No npm. No server. Open directly in browser.

Build in this order. Confirm each step works before continuing.

STEP 1 — LENIS + GSAP

Set up Lenis and GSAP ScrollTrigger using exact CDN imports from CLAUDE.md.

STEP 2 — HERO VIDEO SCRUB

Use exact HTML, CSS and JS from CLAUDE.md. Video: pomegranate-story.mp4.

Text overlays (opacity 0 default, transition: opacity 0.6s ease):

progress 0.15–0.25: RUBY — 96px Cormorant Garamond #f5f0eb weight 300 centered

progress 0.35–0.45: Born from ancient orchards.

28px italic Cormorant Garamond #f5f0eb centered

progress 0.55–0.67: PRESS · POUR · PERFECT

72px Cormorant Garamond #f5f0eb centered

progress 0.70–0.80: Three seeds changed everything.

12px Inter uppercase letter-spacing 4px #f5f0eb position top 10% left 8%

Nav: RUBRA fixed top-left + SHOP fixed top-right

11px Cormorant Garamond, color #f5f0eb, letter-spacing 5px, z-index 100

Progress bar: fixed 2px wide right edge, background #8b0000,

height grows 0 to 100vh as scroll progress goes 0 to 1

STEP 3 — STICKY PRODUCT EXPLAINER

Left 50%: product image, position sticky top 0, height 100vh.

Starts with dawn-product.png. Swaps on scroll via IntersectionObserver.

Right 50%: three 100vh panels. Use CSS sticky only — NO GSAP pin here.

Panel 1 DAWN: "Your morning starts here." — dawn description

Panel 2 DUSK: "The golden hour, bottled." — dusk description

Panel 3 NIGHT: "While you sleep, it works." — night description

STEP 4 — HORIZONTAL COLLECTION RAIL

.h-sticky: NO height property. GSAP handles all spacing.

.h-track: display flex, width 400vw, height 100vh.

4 panels each 100vw 100vh flex-shrink 0.

Panel 1: collection-bg.png, THE COLLECTION centered.

Panels 2-4: dawn/dusk/night product images, name text bottom-left.

GSAP: x: -(scrollWidth-innerWidth), pin:true, scrub:1, invalidateOnRefresh:true

STEP 5 — STACKING RITUAL CARDS

3 sticky cards. Each 70vh, 70% width, max-width 800px, margin 0 auto.

top: 10vh / 15vh / 20vh. Background videos: card-press/pour/perfect.mp4

Video: autoplay muted loop playsinline, scale(1.08)→scale(1.0) over 4s.

Layers: vignette → film grain → crimson light sweep → bottom fade.

Text z-index 5: accent line + number 01/02/03 + word PRESS/POUR/PERFECT + desc.

Word: clamp(72px,10vw,110px) Cormorant Garamond #f5f0eb.
Sweep delay stagger: Card1=0s Card2=1.3s Card3=2.6s.

STEP 6 — PARALLAX STATEMENT

100vh. newsletter-bg.png moves at 0.4x scroll speed. Overlay rgba(0,0,0,0.72).
"Drink what / the earth intended." 80px Cormorant Garamond #f5f0eb italic.
Tagline: RUBRA — Since the first harvest. 10px Inter cream uppercase.

STEP 7 — REVERSE COLUMNS

3-column grid 80vh. All use newsletter-bg.png.
Cols 1+3: translateY(-8% to +8%). Col 2: translateY(+8% to -8%).
Vignette + "Born from the earth." italic overlay centered.

STEP 8 — PRODUCT COLLECTION GRID

Background #0a0005. Heading THE COLLECTION 10px Inter cream uppercase.
3 product cards: dawn/dusk/night-product.png.
Names DAWN DUSK NIGHT in #f5f0eb Cormorant Garamond.
DAWN: "Morning ritual. Pressed at dawn."
DUSK: "Golden hour. Ruby at its warmest."
NIGHT: "Deep restore. While the world sleeps."

STEP 9 — NEWSLETTER

newsletter-bg.png background, overlay rgba(0,0,0,0.60).
JOIN THE RITUAL 52px Cormorant Garamond #ffffff centered.
Email input + SUBSCRIBE button background #8b0000.

STEP 10 — FOOTER

Background #000000. RUBRA centered Cormorant Garamond 16px #f5f0eb.
© 2026 RUBRA. All rights reserved. 12px Inter #444444.

END: ScrollTrigger.refresh(); as the very last line.

— STEP 8 —

Test Locally

Once Claude Code finishes, test the site before deploying.

Start the server

```
cd "/path/to/rubra-pomegranate"  
python3 -m http.server 8080
```

Then open:

```
http://localhost:8080
```

What to check

1. Hero: scroll slowly — video scrubs frame by frame
2. Text overlays fade in and out at the right scroll positions
3. Sticky explainer: image swaps DAWN → DUSK → NIGHT
4. Horizontal collection: 4 panels slide with no black gaps before or after
5. Stacking cards: PRESS → POUR → PERFECT with looping video backgrounds
6. Parallax statement + reverse columns appear seamlessly after cards
7. Collection grid, newsletter, footer all visible and styled correctly

💡 *Hard refresh after any code change: Cmd+Shift+R on Mac, Ctrl+Shift+R on Windows.*

— STEP 9 —

Deploy to Vercel

Once everything looks perfect locally, push to GitHub and deploy on Vercel to get a live public URL.

Push to GitHub

```
git init  
echo "node_modules/" > .gitignore  
git add .  
git commit -m "RUBRA pomegranate luxury scroll website"  
  
# Then create a new repo on github.com and run:  
git remote add origin https://github.com/YOUR-USERNAME/rubra-pomegranate.git  
git branch -M main
```

```
git push -u origin main
```

Deploy on Vercel

8. Go to vercel.com and sign in
9. Click Add New Project
10. Import your rubra-pomegranate repository from GitHub
11. Leave all settings as default — no configuration needed
12. Click Deploy

 Because `index.html` is a single static file with no server, Vercel deploys it instantly with zero configuration.

— REFERENCE —

Quick Reference

Image generation order

#	Filename	Type	Reference
1	image-1-pomegranate-whole.png	Keyframe	None
2	image-2-pomegranate-cracked.png	Keyframe	image-1
3	image-3-seeds-cascading.png	Keyframe	image-2
4	image-4-glass-seeds-entering.png	Keyframe	image-3
5	image-5-glass-full-glowing.png	Keyframe	image-4
6	image-6-hands-wrapping-glass.png	Keyframe	image-5
7	dawn-product.png	Product	None
8	dusk-product.png	Product	dawn-product.png
9	night-product.png	Product	dawn-product.png
10	newsletter-bg.png	Background	None
11	collection-bg.png	Background	None

Page section order

1. Fixed nav (RUBRA top-left · SHOP top-right)
2. Fixed progress bar (2px right edge)
3. Hero video scrub (550vh)
4. Sticky product explainer (DAWN / DUSK / NIGHT)
5. Horizontal collection rail (4 panels)
6. Stacking ritual cards (PRESS / POUR / PERFECT)
7. Full-bleed parallax statement
8. Reverse columns parallax
9. Product collection grid
10. Newsletter
11. Footer

Color palette

Color	Hex Value	Used For
Off-white	#f5f0eb	ALL text — headings, nav, product names
Muted cream	rgba(245,240,235,0.45)	Section eyebrow labels
Muted rose	#a08080	Body and description text
Pure black	#000000	Body background, footer
Deep crimson	#8b0000	Progress bar background only
Ruby red	#c0002a	Buttons, accent lines, card borders

Critical rules to never break

- ◆ Never set height on .h-sticky — GSAP pin spacer handles spacing automatically
- ◆ Never add will-change:transform or transform:translateZ(0) to #source-video
- ◆ Never use GSAP pin:true and CSS position:sticky on the same element
- ◆ Never use window.scrollToY alone — always use getBoundingClientRect
- ◆ Never use canvas for video — only video.currentTime scrubbing
- ◆ Always attach both scroll listeners: window AND lenis.on("scroll")
- ◆ All image assets are .png — always use .png extension
- ◆ Always end the script block with ScrollTrigger.refresh()
